

Technical Bulletin Multiple Wire Rating for Power Blocks

Marathon Special Products has recently provided the ability to use multiple wire combinations to all power blocks with a hole rated for #4 - #14 AWG.

The wire combinations are as follows:

(2) #10 AWG Stranded Copper

(2) #12 AWG Stranded Copper

(3) #12 AWG Stranded Copper

(4) #12 AWG Stranded Copper

(2) #14 AWG Stranded Copper

(3) #14 AWG Stranded Copper

(4) #14 AWG Stranded Copper

With this new feature, an end user now has the ability to supply a multitude of load connections while maintaining a smaller overall footprint. There will be no change to the products electrical or mechanical ratings due to this additional option. The products also retain UL Recognition, reference UL File #E62806 or contact the factory.
